

## Instructions to Authors

The Asian Journal of Pharmaceutical and Clinical Research is a quarterly Journal, which publishes original research work that contributes significantly to increase the scientific knowledge in Pharmaceutical Sciences, Medical Sciences, Pharmaceutical Technology, Pharmaceutics, Biopharmaceutics, Pharmacokinetics, Pharmaceutical/Medicinal Chemistry, Computational Chemistry and Molecular Drug Design, Pharmacognosy and Phytochemistry, Pharmacology, Pharmaceutical Analysis, Pharmacy Practice, Clinical and Hospital Pharmacy, Cell Biology, Genomics and Proteomics, Pharmacogenomics, Plant Science, Bioinformatics and Biotechnology of Pharmaceutical Interest. Further this Journal also publishes original research in the field of General Science, which shows its impact in Pharmaceutical Science. Research in synthesis of new molecules and biological evaluation is also published. The Journal publishes original research work either as a Full Research Paper or as a Short Communication. Review Articles on a current topic in Pharmaceutical Sciences are also considered for publication by the Journal.

Type-written manuscripts prepared using MS Word should be submitted by online submission system or email to [editor@ajpcr.com](mailto:editor@ajpcr.com)

Manuscripts will be subjected to peer review process to determine their suitability for publication provided they fulfill the requirements of the journal as laid out in the instructions to authors. After the review, manuscripts will be returned for revision along with reviewer's and/or editor's comments. Prepare the manuscript in **Times New Roman** font using a **font size of 12**. There shall not be any decorative borders anywhere in the text including the title page. Formatting should be made as follows.

**TITLE- HEPTOPROTECTIVE ACTIVITY OF----- (12 FONT SIZE, TIMES NEW ROMAN, NORMAL, BOLD)**

**AUTHORS- AVIJEET JAIN, AMIT K JAIN, ---(12 FONT SIZE, TIMES NEW ROMAN, NORMAL, BOLD)**

Submission of a manuscript to Asian Journal of Pharmaceutical and Clinical Research for publication implies that the same work has not been either published or under consideration for publication in another Journal. Authors, in their cover note to the Editor, have to clearly mention whether the manuscript shall be considered as a Research Paper, Short Communication or Review Article and also confirm that the manuscript has not been submitted to any other Journal for publication. **Authors publishing results from in vivo experiments involving animals or humans should state whether due permission for conduction of these experiments was obtained, from the relevant ethics committees, in the Materials and Methods section. In addition, authors wishing to publish research work involving human studies should also send a notary verified letter of approval from the Ethics Committee or the Institutional Review Board.**

Manuscript should be divided into Title page, Abstract, Introduction, Materials and Methods, Results, Discussion or Results and Discussion, Acknowledgements, References, Illustrations (Tables and Figures including chemistry schemes along with titles and legends) and Figure and Table titles and legends

**Manuscripts that fail to conform to the requirements of the Journal, as specified under Instructions to Authors, will be rejected outright.**

### **References**

References should be numbered consecutively in the order in which they are first mentioned in the text (not in alphabetic order). Identify references in text, tables, and legends by Arabic numerals in superscript. References cited only in tables or figure legends should be numbered in accordance with the sequence established by the first identification in the text of the particular table or figure. Use the style of the examples below, which are based on the formats used by the NLM in Index Medicus. The titles of journals should be abbreviated according to the style used in Index Medicus. Use complete name of the journal for non-indexed journals. Avoid using abstracts as references. Information from manuscripts submitted but not accepted should be cited in the text as “unpublished observations” with written permission from the source. Avoid citing a “personal communication” unless it provides essential information not available from a public source, in which case the name of the person and date of communication should be cited in parentheses in the text. For scientific articles, contributors should obtain written permission and confirmation of accuracy from the source of a personal communication.

The commonly cited types of references are shown here, for other types of references such as electronic media, newspaper items, etc. please refer to ICMJE Guidelines (<http://www.icmje.org>).

### **Short Communication-**

The journal publishes exciting findings, preliminary data or studies that did not yield enough information to make a full paper as short communications. These have the same format requirements as full papers but are only up to 5 pages in length. Short Communications should not have subtitles such as Introduction, Materials and Methods, Results and Discussion - all these have to be merged into the running text. Short Communications preferably should have only 3-4 illustrations.

### **Review Articles-**

Should be about 18 pages long, contain up-to-date information, comprehensively cover relevant literature and preferably be written by scientists who have in-depth knowledge on the topic. All format requirements are same as those applicable to full papers. Review articles need not be divided into sections such as Materials and Methods and Results and Discussion, but should definitely have an Abstract and Introduction, if necessary.
